DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4, 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith (USP 6,317,916). The patent to Smith discloses a golf club cleaning device (10) comprising a container member (12) which is essentially a flexible bag (column 2, lines 23-26) and a lid member (40) including a slot for inserting the head of a golf club and which lid member includes, adjacent the slot, a plurality of scrubbing bristles (30).

3. Claims 1, 5 and 7-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Glass (USP 6,430,770). The patent to Glass discloses a golf club cleaning device (10) comprising a container (11) adapted to contain a quantity of cleaning fluid (column 3, lines 48-51) and a lid member (13) including a slot (defined between the flaps 21) for inserting the head of the club. The depending brushes (17) read on both the agitator member of claim 5 as well as the scrubber member of claims 7-8. Glass further discloses a cover member (14), tether (19) and tab (see the figures).

Art Unit: 1744

4. Claims 1,5,9,10 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Pimentel et al (USP 6,745,424). The patent to Pimentel discloses a golf club cleaner (10) comprising a container (12), lid member (21) with a slot (21a), agitator member (20a,20b), cover member (18) and clip (48).

Allowable Subject Matter

5. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claim 13 is allowed.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Each of the cited patents are further pertinent to club cleaners with a container and a slot for inserting the club.
